

Coding & Solution

Date	30 September 2026
Team ID	6ab2a427dbd693aadc5a7d4b
Project Name	Student Enrollment & Course Management System(SECMS)
Maximum Marks	5 Marks

Coding & Solution

The coding is developed based on the project requirements to provide effective and reliable solutions. The code handles the required operations correctly and helps the system perform its functions efficiently. Proper logic and suitable programming techniques are used to solve the given problems

Instructions:

The instructions are provided in a clear step-by-step manner to help users operate the system easily and correctly.

1. Open the application and log in.
2. Enter the required student details.
3. Select the required course.
4. Submit the enrollment details.
5. Verify the student and course information.
6. View the final enrollment details.

Solution Summary

Field	Details
Repository Link / URL	gh repo clone pdharshu265-dev/Student-Enrollment-Salesforce-Project
Programming Language(s)	HTML,CSS, JavaScript
Framework(s) Used	None

Key Features Implemented	Student Registration,Course Selection,Student Enrollment,Form Validation,User-friendly interface.
Pending / Incomplete Features	None

Setup / Run Instructions

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

Additional notes and comments are included to explain important parts of the code and provide useful information. They help developers understand the purpose and functionality of different code sections, making the code easier to maintain and modify in the future.
