Project Name	Student Enrollment & Course Management System (SECMS)
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. The Student Enrollment and Course Management System (SECMS) helps to analyze the difficulties faced by students during admission, course selection, and enrollment tracking. This empathy map focuses on a new student seeking admission who struggles with manual processes, lack of transparency, and delayed updates. This helps the team build a customer-centric and user-friendly digital solution that simplifies enrollment and improves course management

SAYS • Admission process is too complicated • I can't find which courses are available • I submitted form but no update received • Why do I need to visit college multiple times?	THINKS • Will I get my preferred course? • Is my application safe? • This system should be online & fast • I might miss the deadline"
PERSONA NAME <i>(Role / User Type)</i>	

DOES

- Searches college website repeatedly
- Fills manual forms & stands in long queue
- Calls admin office for status
- Visits college physically for updates

FEELS

- Frustrated with manual process
- Anxious about admission confirmation
- Confused about course selection
- Helpless due to lack of transparency
